

# ARTIST IN RESIDENCE

## TAKE 2

to book us: email  
take2biz@gmail.com

### about the program:

*For a small fee, you can participate in our artist-in-residence program. This full-day or half-day program provides a more in depth experience for aspiring musicians AND culminates in a free 40-minute concert for the entire school!*

#### ▶ **Songwriting Basics**

With one album released and another on the way, Take 2 can teach the kids songwriting mechanics, and how they craft a song from start to finish. Students learn about rhyming and writing good lyrics, then get a starter chord progression along with a challenge to come up with their own musical hook and lyrics.

#### ▶ **Fireside Chat**

Take 2 spends an hour answering questions and sharing stories about X-Factor and The Voice, how they got started, and what it's like to tour. This makes a great English biography writing project or motivational talk for a music class. Starter questions provided.

#### ▶ **Instruments**

Take 2 has been singing in choral groups throughout their high school careers, and they will teach students to sing harmony, a cappella, or even beat box. The group can perform their song at Take 2's concert for the whole school.

#### ▶ **Loopy** (requires student iPads)

Learn how to compose music using the Loopy app that allows students to layer vocals and instrument tracks. Take 2 will teach students how to sing harmony, how to beat box and recreate popular songs using the Loopy app. \*The school needs to install Loopy before we arrive - it costs \$3.99 per station.

#### ▶ **A Capella Singing or Teach Chorus**

Take 2 has been singing in choral groups throughout their high school careers, and they will teach students to sing harmony, a cappella, or even beat box. The group can perform their song at Take 2's concert for the whole school.

#### ▶ **Make A Music Video**

With over 70 videos YouTube, 2.5 million views, and 15,000 followers, Take 2 will teach the process of creating a music video. In this full-day program, they will plan and shoot a complete music video with students. Your own students will appear in one of Take 2's upcoming music videos. As an option, Take 2 can teach the editing process on Final Cut Pro. The raw footage can be left with students to edit their own version of the "final cut" of the video.
